

E-QSL

The picture shows the antennamast Radio Veronica is using in Westdorpe in the southwest of the Netherlands for our 5955 khz signal.

The antenna in use for 5955 khz is an inverted-V mounted in the lower section of the mast and is clearly visible on this picture.

The shortwave transmitter Radio Veronica is using is a home-built solid state rig giving a carrierpower of 200 watts.
