Dear FREE RADIO enthusiast!

As you might know it took some time that **RTI** did an up-to-date press release what did happen during the past months or years. Now after a little break we will be back on the air. Finally we updated our information booklet with our station history from 1975 to 1996 and we sincerely hope that you all like it as we do! Unfortunately **RTI** cannot run any programme schedule in the future due to several circumstances but we hope that you will join our shows now and then, anyway,

Some more relays may occur in April on 7460 kHz USB via KIWI Radio on Saturdays or Sundays at about 08.00 UTC from New Zealand and on the 6955 kHz USB at about 23.00 UTC via US based stations, e.g. the NAPRS. The shows are called again "**TITANIC ON THE ROCKS**"!

On April 14th, 1912 after only 5 days of her maiden voyage the world's largest - most luxurious ship to grace the seas - the "RMS TITANIC" - had been mortally damaged by an iceberg and 2 hours and 40 minutes later she sank taking with her more than 1500 people!

Thoughout it all the "TITANIC" casts its spell, showing that it cannot be forgotten or ignored even after all those 84 years! The "TITANIC" story will never die! It has a mystique about it which fascinates people like us! We learn from the fate of this beautiful ocean liner that "man proposes but God disposes!" In remembrance of those souls who perished with the "RMS TITANIC" on April 14/15, 1912 the crew of **RADIO TITANIC INTERNATIONAL** is willing to continue broadcasting on the Free Radio bands as long as our spare time will allow us to do so! God bless you! Tim at **RTI**
