KEEPS THE SHORTWAVE ALIVE

Dear Radio Member,

Radio Delta is located in the beautiful Elburg, a historic fishing village with a rich maritime history. It is known for its picturesque harbor, charming streets, and friendly residents, making it a perfect location for a radio station that embodies passion and tradition.

Over the past month, we have been testing on 9800 kHz to improve our coverage in Europe, and we are pleased to report that we have received many responses from listeners across different continents! During our nighttime broadcasts this weekend, we received two remarkable reception reports from Indonesia and South Africa. Your feedback is incredibly important to us, and we would love to share your stories.

One of the highlights of our programming is our hourly segment, where we have a fun item titled The Record and its Story. In addition, there is also a listener's story featured every hour. This segment allows listeners to share their experiences and anecdotes, giving a personal touch to our broadcasts. We are confident that you will not want to miss this musical and storytelling journey!

If you send us an email next time with your reception report and some fun photos, we will turn your story into a radio segment for our show. We love sharing your experiences and adventures with our audience!

Currently, we are using advanced transmitting (1000 watt) equipment and antennas to ensure a strong and clear connection. This includes innovative designs for antennas that are tailored for optimal performance and coverage. All of our equipment is self-built, utilizing modern technologies to guarantee the quality of our broadcasts.

We hope to meet you again soon on 9800 kilohertz! Thank you for your support, and we look forward to the next broadcast!

Best regards,

The Radio Delta Team

**THANKS FOR LISTENING
TO RADIO DELTA!**
