3 Re: Gander Radio 6604kHz

Dear Erik,

Thank you for your message. It is truly enlightening to receive messages from listeners like yourself, spanning across different corners of the globe.

This is confirmation that your reception report is correct. I regret to inform you that currently we do not have QSL cards. However, I am actively exploring the possibility of reintroducing them. As being newly tasked with responding to these messages for the Gander IFSS, I am sure I will find it very interesting, and I look forward to corresponding with HF enthusiasts like yourself in the future.

Best regards,

Jennifer Bath

IFSS Operations Specialist

Gander HF Equipment

14 Rohde & Schwarz 4100 4 kW SSB Transmitters

7Thales TME5415 5 kW SSB backup Transmitters

31 Rohde & Schwarz EK4100D Receivers

Gander Radio Facts

Gander Radio began operations in 1938 and provides aeronautical communication services over the North Atlantic and Canadian/US Arctic region, covering approximately 6.5 million sq km of airspace.
