RECEPTION WHERE YOU NEED IT
FROM BEHIND THE REDWOOD CURTAIN
TO BACKROADS EVERYWHERE

800-522-8863
ccrane.com

Our area up here in Northern California is often referred to as "Behind the Redwood Curtain." Reception-wise, that curtain is tough to get through. This challenge of getting reception is what gave birth to C. Crane's radio division. When the Cranes (founders of C. Crane) moved up from the Bay Area, they couldn't get their favorite station, KGO. They found an antenna that helped them receive the signal and started selling it from their home.

C. Crane was born solving reception problems. We still help people pull back the curtain and let the signal in. Whether it's AM, FM, shortwave, internet radio, or long-distance WiFi, we work to get the signal where you need it. With fewer local stations and more interference than ever, we've seen more interest in internet radio. That connection to radio, no matter how it's delivered, is what keeps us close to the people who make it happen.

This past year, I was fortunate to be on calls with station owners, hosts, and station managers, and even visit a few stations. One phrase I kept hearing was "Last man standing." It spoke to me about holding on and keeping the signal alive when others fade away. We understand that feeling. We're one of the few American-owned radio companies still around, and we're proud to join many of these stations in promoting **"Every Home Needs a Radio,"** so you'll have one when you need it most.

Thank you for continuing to support us in all the ways that you do. The work never stops, and neither do our efforts to improve. Every product is built to solve real problems and backed by service you can count on long after the sale. We believe people deserve to be treated the way we'd want to be treated, and that will never change.

Jessica

CCRadio Solar BT

Solar Digital with Bluetooth® Receiving AM, FM, Weather + Alert Windup Emergency Radio

Bluetooth® convenience. Radio reliability. Built to work every day or in an emergency.

Although it is successful as an emergency radio, the form and function invite you to use it daily. Set it in a sunny window and catch the morning news or stream a podcast via Bluetooth. You get the best of both worlds: reliable radio reception and wireless audio from your smart phone or tablet.

Audio is a surprise with clear, voice-focused, accuracy, and two modes: a miser mode to stretch battery life in an emergency, and a high-power mode for fuller sound when conditions allow.

Reception is strong for the size. The compact design features UV-resistant rubber edges and a concave base for extra stability. The flashlight outshines most, thanks to a high-quality LED with brighter, cleaner light. The hand crank folds neatly into the back.

Power it by solar, hand crank, USB, or optional AC adapter (not included). Also runs on **(3) AA batteries (not included).** **Features:** Full lithium-ion battery charge gives you 35-50 hours of playtime depending on settings or enough to recharge your phone from about 50% to full. 5 one-touch memory presets per band, clock, alarm, sleep timer, aux-input jack, and stereo headphone jack.

Patent #US D960,860 S.
Weight: 1.1 lbs. (without optional batteries).
Size: 6" W x 3" H x 2.25" D.

Item # CCRSBT Radio \$109.99

Item # CCRSBTP AC Charging Adapter (optional) \$14.99

Item # AA Size Alkaline Battery (optional) \$0.99 ea.

CC SKYWAVE™ SSB 2

The Swiss Army Knife of Portable Radios

AM, FM, Shortwave, Weather + Alert, VHF Aviation Band and Single Side Band

The Skywave SSB 2 offers **extensive and accurate band coverage** in a compact, travel-ready design. It's built for anyone who wants dependable access to information, whether you're flying, hiking, monitoring world news, or navigating an emergency when other communication fails.

With AM, FM, Weather with Alert, Shortwave, civilian Aviation VHF, and Single Side Band, it's one of the most versatile radios you can own. SSB allows long-distance listening to ham operators, one of the few reliable ways to get information after hurricanes, earthquakes, or grid failures. Tuning is precise, down to 10 Hz.

The latest version includes smart upgrades:

- **External Shortwave Antenna Jack** for enhanced SW reception
- **Reliable Micro-USB Charging** from any USB source
- **In-Circuit Charging** for optional NiMH AA batteries
- **Improved Speaker & Amp** for cleaner, louder sound
- **Stabilizing Feet** for a more solid base

Features: Rotary volume dial, squelch control for aviation, voice/music tone control, stereo headphone jack, 400 memory presets, clock, alarm, sleep timer, and 9/10 kHz AM tuning. Runs on (2) AA batteries for about 65 hours. Optional 5V AC Charging Adapter with a micro-USB tip is available.

Included: CC Wire Terminal Antenna Adapter for shortwave (2-wire to mono plug), a portable 23' CC Shortwave Reel Antenna, high-quality original CC Buds™ and a faux leather carry case. Patent #US D863, 251 S.

Weight: 6.0 oz. (without optional batteries).

Size: 4.75" W x 3" H x 1.1" D.

Item # SSB2 Radio \$189.99

Item # SSB2P AC Charging Adapter (optional) \$14.99

Item #NHA AA Size NiMH batteries (optional) \$2.99 each

For more information about Single Side Band visit: ccrane.com/ssb-info

CC SKYWAVE™ 2

With AM, FM, Shortwave, NOAA Weather + Alert and the VHF Aviation Band

The CC Skywave can help you discover local culture when traveling to a new city or country. It covers all the AM/FM and Shortwave bands worldwide.

The reception, audio and durable build are what this radio excels at.

The Skywave has an intuitive layout so it's easy to use. Incoming radio signals can be manipulated to reduce interference.

When your flights are delayed it can be imperative to find out what's going on. The Aviation Band lets you listen in on nearby pilots, air traffic controllers and ground crew. English is the standard language used in aviation worldwide.

With **the shortwave antenna jack** you can noticeably improve shortwave reception when used with an external antenna.

Included are the high-quality *original* CC Buds™ for your listening pleasure, a carry case and hand lanyard for walking.

Features: Rotary volume dial, squelch control for aviation, voice/music tone control, stereo headphone jack, clock, alarm, sleep timer, 400 memory presets, and 9/10 kHz tuning. Runs on (2) "AA" batteries (not included) for approximately 60 hours or optional 5V AC Charging Adapter with micro-USB tip (not included). It has a simple timed battery charger for optional "AA" NiMH rechargeable batteries.

Weight: 6.0 oz. (without optional batteries).

Size: 4.75" W x 3" H x 1.1" D.

Item # SKWV2 Radio \$109.99

Item # SKWV2P AC Charging Adapter (optional) \$14.99

Item # CCSWA Shortwave Reel Antenna \$14.99

Item # CCSWT CC Wire Terminal Antenna Adapter \$14.99

\$5 off an accessory with purchase of new CC Skywave 2 radio.

CCRadio 2E

Portable Clock Radio with Long-Range AM, FM, NOAA Weather + Alert and 2-Meter Ham Band

The purpose of the CCRadio 2E is to make weak signals strong and to produce accurate audio for the spoken word. AM performance comes from our Twin Coil Ferrite® AM Antenna. Traditional FM reception is exceptional in its ability to bring in a weak station clearly. The audio of this enhanced version can be adjusted for an accurate warm voice rendition, along with good musical performance.

This radio also has the NOAA Weather Band and Alert along with the 2-Meter Ham Band. More information about the 2-Meter Ham Band can be found at: ccrane.com/2-meter.

Features: Clock, alarm, sleep timer, 5 one-touch memory presets per band, line in/out jacks, stereo headphone jack, 1 and 10 kHz tuning, external AM antenna screw type balun terminals and NOAA weather alert. Runs on **included AC power cord** or 4 "D" batteries (not included). Runs approximately 170 hours with batteries at moderate volume level with the display light off.

Weight: 4 lbs. (without optional batteries).

Size: 11" W x 6.5" H x 4" D.

Item # CC2BE Black Mica color \$199.99

Item # CC2TE Titanium color \$199.99

Item # CA3 CCRadio 2E / CCRadio 3

Carry Case (See page 7) \$39.99

Item # AD - "D" Size Alkaline Battery (optional) \$2.99 ea.

AVAILABLE IN
TITANIUM COLOR

CCR3 Radio 3

The Almost Everything Clock Radio

Exceptional AM, FM, NOAA weather + Alert, 2 Meter Ham Band, with Bluetooth® Receiving for Streaming Audio

The CCRadio 3 has **exceptional long-range reception of AM/FM stations** along with NOAA weather and 2-Meter Ham Band emergency capabilities. With the addition of Bluetooth® receiving, the CCRadio 3 can receive an immense variety of radio shows from any smart phone or tablet.

The audio of the CCRadio 3 sounds like the radio host is sitting next to you. Separate bass and treble knobs can be adjusted to your preferred pitch. If you listen primarily to voice content, the CCRadio 3's audio is arguably worth the price alone. We have reorganized a few buttons so you can now toggle between AM and FM bands easily.

Features: Clock, alarm, sleep timer, 5 one-touch memory presets per band, Bluetooth receiver, line in/out jacks, stereo headphone jack, 1 and 10 kHz tuning, external AM antenna screw type balun terminals and NOAA weather alert. Runs on **included AC power cord** or (4) "D" batteries (not included). Runs approximately 170 hours with batteries in radio at moderate volume level with the display light off. Available in Black Mica color only.

Weight: 4 lbs. (without optional batteries).

Size: 11" W x 6.5" H x 4" D.

Item # CC3B Radio \$229.99

Item # CA3 CCRadio 2E / CCRadio 3 Carry Case \$39.99

Item # AD - "D" Size Alkaline Battery (optional) \$2.99 ea.

RIGHT SIDE

CC POCKET

With AM, FM and NOAA Weather + Alert

We combined ease of use, good reception and sharp well-defined audio together in this little jewel of a radio. You can listen from the built-in speaker or the **included high-quality original CC Buds™** tuned for superior voice clarity and music.

It has five one-touch memory “car radio” type buttons for each band and stands upright when needed. Rubber coated sides help with grip. Lock switch to prevent accidental on/off or station changes.

Features:

- Display light, sleep timer, clock and alarm, belt clip, stereo headphone jack
- FM stereo or mono switch (stereo through headphones)
- Clock alarm, sleep timer, belt clip, stereo headphone jack
- NOAA Weather with Alert (disables AM/FM radio while activated)
- 30" FM antenna wire included
- 1, 9 & 10 kHz tuning steps
- Volume control with a non-stop rotary dial

Runs 80 hours on (2) “AA” batteries (not included) with speaker and 100 hours with earbuds.

Patent #US D 719,130 S

Weight: 3.8 oz. (without batteries).

Size: 2.5" W x 4.25" H x 1" D. One-year limited warranty.

Item # CCPKT Radio \$74.99

Item # AA Size Alkaline Battery (2 AA required) \$0.99 ea.

CC BUDS

CCRadio-EP PRO

Simple High Performance AM/FM Portable with Analog Dial and Digital Performance Inside

The portable CCRadio-EP PRO could be considered a super radio. **It's built for ease of use and outstanding long-range AM** with our C. Crane Twin Coil Ferrite® AM Antenna. The dial accuracy and frequency stability of the EP PRO is superior to our original EP model. The tuning light lets you know when you are exactly on the station. This radio is designed for someone who wants excellent reception and sound without all the bells and whistles.

The EP PRO has separate bass and treble adjustment for accurate and lively voice reproduction. A large, 5-inch speaker is combined with a hi-fidelity amplifier. AM programs can be adjusted to sound similar to FM because of a "Wide/Narrow" enhancement switch and the fine-tuning control of the Twin Coil Ferrite Antenna. FM reception is excellent with full rich audio.

Features: Lighted tuning dial, flip up carry handle, 9 and 10 kHz tuning switch, FM mono/stereo switch, line in jack and stereo headphone jack. External antenna connections included, spring clips for AM and "F" connector for FM. Runs on **included 6V AC adapter** or (4) "D" batteries (not included). Runs for approximately 175 hours on a fresh set of alkaline batteries at moderate volume with the display light off.

Weight: 4.5 lbs. (without optional batteries).

Size: 11.4" W x 7.3" H x 2.75" D.

Item # CEPRO Radio \$99.99

Item # AD - "D" Size Alkaline Battery (optional) \$2.99 ea.

- No Static
- No Signal Dropouts
- No Apps
- No Tracking Ads
- No Eavesdropping mics

CC WiFi 3 Internet Radio with Skytune and Bluetooth® Receiving

The CC WiFi 3 lets you hear a clear, reliable signal from your favorite station and opens up a world of new ones. With over **25,000 stations** to explore, you can travel the globe by radio: discover jazz from Paris, talk shows from your hometown thousands of miles away, folk music from Ireland, or add your own custom streams through URLs. No monthly fees.

Search by genre, language, location, or topic; it's easy to find what you want to listen to and it sounds like it's next door. The **included 5dBi external antenna** delivers outstanding WiFi reception, better than any internet radio we've tested. Still too far from your router? Add our optional Parabolic WiFi Antenna and reach even farther: ccrane.com/parabolic-power-antenna.

Bluetooth® receiving adds wireless streaming from your phone or tablet. **Features:** Alarm, sleep timer, stereo headphone jack, line-out for speakers, adjustable equalizer, and a full-size remote. Runs on 5V AC adapter (included) or using the included USB to Radio Power Cord to connect to a USB Port (3.5mm x USB Cable).

Key Benefits:

- Crystal Clear Audio: **No static, no fade**
- Over 25,000 stations - **always something worth listening to**
- No microphone = **no spying or tracking**

Our **U.S.-based technical support** is ready to assist. One-year limited parts & labor warranty. Station content and availability are provided by Skytune. C. Crane has no control over content or the stream provider for internet radios and is not responsible for Internet radio programs or availability. **Note: The CC WiFi 3 uses WiFi only and does not have an Ethernet port.**

Weight: 1 lb. 2.6 oz. **Size:** 6.5" W x 3.9" H x 3.9" D.
Item # CWF3 Radio \$139.99
Item # AAA Size Alkaline Battery
(2 Required for Remote Control) \$0.99 ea.

The Pros and Cons of WiFi and Internet Radio

Internet radio streams audio via your high-speed internet (usually WiFi), offering crystal-clear sound without static.

Pros:

- **Crystal-clear sound** - No static or fade, even in tough reception areas.
- **Stations from anywhere** - Local, national, and worldwide broadcasts at your fingertips.
- **Keeps favorites close** - Great if you've moved too far away or your local station dropped a show you love.
- **Extra features** - Many models include Bluetooth® and access to podcasts or other streaming or direct URL entity.
- **Programmable presets** - Save over 100 presets of your favorite stations.
- **No subscription fees** - Most streams are free (internet service still required).
- **Lifetime U.S. based tech support** - When purchased from C. Crane.

Cons:

- **Internet required** - No connection means no radio.
- **Slight Delay** - A few seconds behind AM/FM broadcasts.
- **Some content missing** - Certain sports and events aren't streamed due to licensing.
- **Too much choice** - Thousands of stations to choose from.
- **Not very portable** - Most stay in one spot, though some models have rechargeable batteries.

Not sure if your favorite station or show is available? Give us a call and we'll help you find the right radio for how and where you like to listen. Learn more: ccrane.com/internetradio

FM TRANSMITTER 3 - Limited Supply (With Expanded Band Coverage)

The FM Transmitter 3 is a great way to deliver near-broadcast audio from any digital audio device to an open FM frequency on a traditional radio. A good example would be using the transmitter with a CC WiFi 3 to broadcast streaming audio to all the traditional radios in a house. Use the transmitters' attached cable to connect to a headphone jack on your smart speaker, smartphone, or television to send near-broadcast quality audio to any nearby radio or stereo system. See more at: ccrane.com/fmtransmitter

Maximum distance of about 45 feet line of sight with no obstructions. Broadcast distance will vary depending on your location (for more information, Google: ccrane fm transmitter 3). With maximum coverage from 87.5MHz to 108MHz it is not difficult to find an empty FM frequency. Includes 6" dual RCA plugs to 1/8" stereo jack audio patch cord. Runs on included AC adapter, or (2) "AA" batteries (not included).

Weight: 5.8 oz. (without optional batteries).

Size: 3" W x 3.5" H x 1" D.

Item # FM3 Transmitter 3 \$89.99

Item # AA Size Alkaline Battery (optional) \$0.99 ea.

⚠ WARNING: Cancer and Reproductive Harm. www.P65Warnings.ca.gov

Behind the Signal. Tuning, Testing, Reinventing.

Because some things, like great reception, are worth holding onto.

Improving reception is in our DNA. Whether you're catching the late-night talk show from your bed, trying to hear a game in a noisy workshop with a metal roof, or getting the weather update when the power's out, we stay focused on the radios people depend on every day. Most manufacturers are chasing smartphone parts or designing for cars. We're committed to clear reception in the places you actually listen. That takes a rare mix of deep experience and modern ingenuity.

Fortunately, we have some of that right here in-house. Jarl has been with C. Crane for over 20 years and is the go-to guy for anything deeply technical about radio or the way a radio board or part works. Isaiah has been here for 20 years and is one who thinks outside the box and can explain complicated things in a way that's easy to understand. They work directly with our manufacturing partners to keep projects moving, find replacements when parts are discontinued, and troubleshoot the occasional stubborn bug.

It all comes back to a passion for our customers and for solving problems. We make radios that hold up in real-life conditions and keep working to improve reception, audio, and reliability. And while we take that work seriously, we don't forget to enjoy the process.

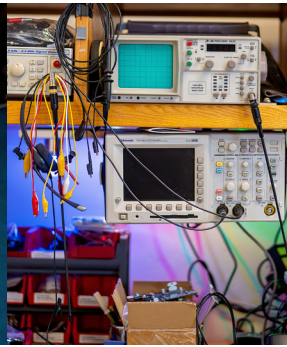

All products come with a 60-day satisfaction guarantee, 1-year warranty and US-based tech support.

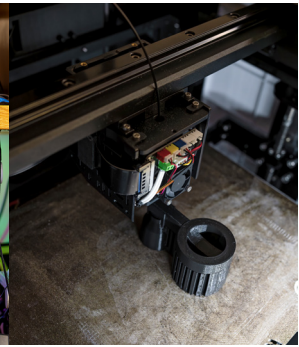

Jarl and Isaiah, Product Development team members, display the inner workings of a radio.

How To Make A Simple, Powerful AM Loop Antenna - For Free

Here is what you need:

- 100' or more of any type of insulated wire
- Twist or Zip ties or tape to hold the shape of the coil
- (2) alligator clips
- 3'-4' foot ground stake (metal stake or 1/2" pipe)
- Adjustable pipe clamp that fits around your metal stake

Step 1 - Form a three-inch coil with seven turns. Secure it with ties or tape. Attache one alligator clip to no less than 60' of wire (more is better - 100' is great).

Step 2 - Connect the other end of the coil to the ground stake. Drive the stake into a safe, convenient spot.

Step 3 - For best results, run the antenna wire perpendicular to the station you want to hear. A safe mounting height is about eight feet.

Step 4 - Bare the end of the antenna wire and clip it to the coil. Alligator clips make for a better connection.

Step 5 - Sand off any rust under the clamp on your ground stake. Damp soil helps conductivity; in very dry soil, pour some water around the stake. Clip the wire to the clamp.

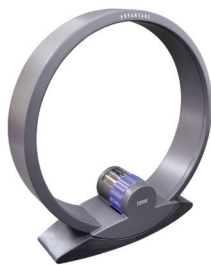

Step 6 - Tune your radio to a weak station. Move the coil near the radio until the signal improves. You don't attach this antenna directly - the coil boosts the signal and your radio's internal ferrite antenna picks it up.

Experiment with coil size, turns, and wire length. Loop antennas work great for AM and can be adapted for other bands with some tweaks. We'd love to hear your results or see photos of your setup so fellow listeners can benefit. Send them our way - you might help someone else bring a "dead" station back to life. Learn more at: ccrane.com/DIYAntenna.

TERK® Indoor AM Antenna

The Terk Indoor AM antenna normally doubles the audio from a weak AM radio signal. At nighttime it can reduce fadeout by 90%. It is best used on a portable radio. No attachment is necessary because it induces a stronger signal into the ferrite antenna inside the radio. When the power is out like in a hurricane this antenna can be used to pick up a more distant AM radio station for news.

With simple experimentation you will find the best position in relation to your radio. Tune your portable or clock radio to a weak AM station. Place the antenna 1" or 2" away from your radio and adjust the tuning knob.

The TERK comes with a wire with twin leads so you can connect it directly to your stereo or radio.

Size: 9.25" H. Item # TR1 Antenna \$54.99

It is a "loop" antenna that responds remarkably well to the AM frequencies 520-1710 KHz. C. Crane was started with this type of antenna 40 years ago in 1983. Forty years before that this type of antenna was mounted on several types of WWII aircraft to find their way home after a bombing run. It was tuned to a radio signal for an approximate direction and then swiveled 90 degrees so the pilot could fly what's known as the "null" (no signal) which was within one degree of the correct way to fly home. Of course, there was the possibility they were flying in the exact wrong direction even with a compass. If the signal got weaker, they would turn around. Remember there were no satellites, GPS or computers at that time.

Note: This antenna may not help with noise and static. It can actually make it worse. Please read content on: ccrane.com/radionoise to determine if this is your problem.

FM Reflect-2 Dipole Antenna

The FM Reflect-2 is a modern solution to a standard indoor dipole antenna design. It performs just as well, if not better than the original the FM Reflect, plus its appearance is a marked improvement. With its increased flexibility and simple installation, it can be easily and neatly shaped into various positions for the best FM reception. Small holes are located at the mounting points so push pins or small nails are all you need for mounting.

It comes with multiple adapters that work with the vast majority of stereo receivers and other radios. We included a standard male "F" coaxial connector for stereo receivers, plus a 3.5 mono plug adapter for some popular tabletop receivers. For the experimenter with a portable radio, there is an "F" female wire terminal connector (spade) and an alligator clip for attachment to a telescopic antenna.

Size: 55.2" element with a 99" feed line.

Item # FMR2 Dipole Antenna \$15.99

Weight: 0.4 oz.

Item # SCE Earphone \$5.99

(Buy 4) get one free.

Why Voice-Focused Audio Matters

At C. Crane, we design our audio with one thing in mind: clarity, especially for voice. Most audio gear is built for music, but we found that talk radio listeners were being overlooked. Our founder, Bob Crane, started using the term **voice-focused audio** years ago to describe what we were aiming for: radios and earphones that make voices sound crisp, natural, and easy to hear.

When sound isn't clear, it can make listening less enjoyable or it can be harder to follow what's being said. Your brain works overtime to fill in the gaps, which can wear you out. Whether it's talk radio, audiobooks, or podcasts, our products may reduce listening fatigue and strain, so you can listen more comfortably and with less effort. And yes, they sound great with music too, just different. You might even catch lyrics you've never truly heard before.

ORIGINAL SOFTSPEAKER™ PILLOW SPEAKER

This Pillow Speaker has Saved a Marriage or Two...

The SoftSpeaker is the first pillow speaker designed not just to go under your pillow. It can sit right on your pillow, closer to your ear, so only you can hear it. We started manufacturing pillow speakers over 20 years ago and realized they break more often than one would think. We took up the quest to design a better sounding, longer lasting Pillow Speaker. Our design uses a high-quality **Kevlar® cord** wire and a very flexible rubber protective outer cover to help improve the longevity. To stand behind our designs, we offer a one-year limited warranty on all earphones.

The SoftSpeaker-2, now with a Kevlar® cord, has an in-line volume control so you don't have to reach for your radio or phone to control the volume. Both speakers offer the perfect combination of comfort, privacy and quality. Plug the speaker into the headphone jack of any radio or smart phone, put it on your pillow and enjoy some of the highest music and voice fidelity available. You will need to purchase a headphone adapter if your device does not have a standard 1/8 inch (3.5mm) headphone jack.

Patent #US D874,441

Size: 2" Dia., 6.5' cord with 1/8" (3.5mm) stereo plug.

Removable, teddy bear soft washable cover.

Item # PS2 SoftSpeaker \$22.99

Item # SSV SoftSpeaker-2 with Volume Control \$24.99

**VOLUME CONTROL
SOFTSPEAKER-2**

LEFT SIDE

RIGHT SIDE

SOFTSPEAKER™ 3K AMPLIFIED Pillow Speaker with Kevlar® Listen Easier

The SoftSpeaker 3K amplifies audio from modern devices where the volume is sometimes too low such as Smartphones, iPads®, Kindles® and other tablets. It can also compensate for some common hearing loss*. May also help insomnia with white noise and in some cases, tinnitus by adding background audio.

It is larger and softer than our other pillow speakers for more comfort. A stereo signal is fully combined so there is no drop-out loss from the right or left channel. A neodymium magnet speaker provides superior clear audio. The tone control switch can be set for voice or music. A rotary wheel adjusts the volume control. It delivers high quality audio, up to three times louder than a non-amplified pillow speaker. Reinforced **Kevlar®** cord between speaker and In-Line control box for maximum durability.

You will need to purchase a headphone adapter if your device does not have a standard 1/8 inch (3.5mm) headphone jack. The automatic sleep timer can be set to 1, 4 or 8 hours. Requires (2) AAA batteries (not included). Battery life is about 80 hours when using the "Voice" setting; built-in battery level checker.

Note: You may need to lower the volume on your host device to eliminate distortion.

Patent #US D874,441 and D878,324 S

Size: Pillow is approximately 3" W x 4" H x 1" D. Amplifier approximately 1" W x 3" L x 3/4" D. Total cord length 6.5' with volume control at 2 feet.

Item # PS3K SoftSpeaker 3K \$29.99

Item # AAA Size Alkaline Battery (2 Required for Amplifier) \$0.99 ea.

* We do recommend you see a professional audiologist for a hearing test and recommendations.

CC BUDS™ PRO

The CC Buds Pro are designed to help you hear the spoken word – whether you're listening to storytelling, news radio, podcasts or audiobooks. The majority of high-quality earbuds are built for music and have enhanced bass response, making words more difficult to hear. Our CC Buds Pro have accurate bass that's similar to studio monitor type bass, but not booming, and are designed for voice clarity.

Included is a carry pouch and three sets of small, medium and large covers in comfortably soft silicone and compressible foam*. The foam covers provide enhanced bass and noise isolation. 1/8" (3.5mm) stereo plug for anything with a headphone jack. 4' cord with strain relief.

Item # CCBUDSPRO \$19.99 (Buy 2) and get one free.

CC BUDS™ SOLO

Single Earbud Optimized For Voice

The CC Buds Solo single earpiece provides a unique advantage over traditional earbuds. It allows you to interact better with others while listening to radio, podcasts or audiobooks. The integrated stereo to mono plug works with smartphones, radios, tablets and most other audio devices.

The Solo can give you a safety advantage when running, biking or walking because you are more likely to hear if danger approaches. **The cable is Kevlar® reinforced for maximum durability.**

Audio is tuned for superior voice clarity. **Included are three silicone and three compressible foam* covers - sized small, medium, large, clothing clip and carry pouch.** The small covers usually fit a small ear comfortably. 1/8" (3.5 mm) headphone plug. Cord Length 4', with strain relief.

Item # SOLO Bud \$15.99 (Buy 2) and get one free.

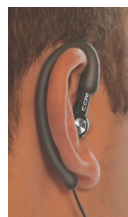

*Regardless of what earbuds you own, it is recommended that you replace the earbud covers annually or whenever you notice wear and tear, to prevent pieces from going inside your ear canal.

CC EARHOOKS™

Keep Your Earbuds In Place

Use the CC Earhooks to securely fit the C. Crane CC Buds Solo or CC Buds Pro. Made of soft silicone rubber for comfort and flexibility. CC Earhooks come in a pair for Right and Left ears.

Item # HOOKD Earhooks (Earbuds not included) \$9.99

⚠ WARNING: Cancer and Reproductive Harm. www.P65Warnings.ca.gov

WIFI SOLUTIONS

The CC Vector™ is a system to receive a long range 2.4 GHz WiFi signal from your router and repeat the signal to **all WiFi devices** in a new location which saves the cost of a new Internet service. We have three different models to choose from depending how far you are away from your router. Go to: ccrane.com/booster to view all the models in greater detail.

WiFi Knowledge Base: All WiFi repeaters drop your speed because it must do twice the work. Most people will not notice the drop because there is still enough headroom for doing basic browsing. If the highest speed is critical, consider our Extended Long Range WiFi Bridge System: ccrane.com/extended-long-range-wifi-bridge-system or getting a new internet service installed.

Tips to Improve your WIFI for Free

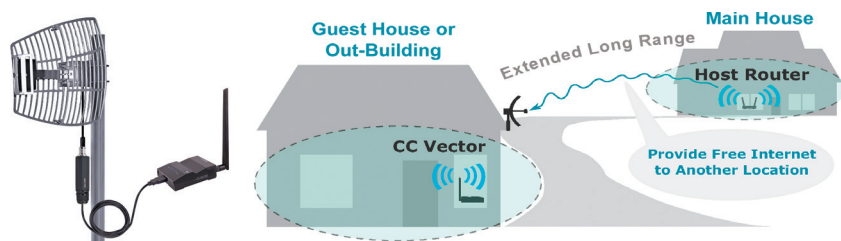

1. The most effective way to maximize your home WiFi coverage is to centrally locate your router in the middle of your home. Mount the router as high as possible on the 1st floor (or level that you use the internet mostly). Keep the router antenna vertical for best horizontal coverage and horizontal for best vertical coverage.
2. Avoid metal since it affects your WiFi signal in new and unusual ways. Brick and concrete type materials block the signal and will reduce your signal coverage. Move your router away from your microwave and some cordless phones if the internet slows down when they are used.

For more information on simple and free ways to improve existing WiFi reception go to: ccrane.com/tips-for-improving-wifi-reception. **To receive expert advice from one of our U.S. based WiFi Techs, call 800-522-8863 (see page 22 for tech support hours.)**

1. CC Vector Extended Long Range WiFi Receiver System 2.4GHz - Limited Supply

How it Works: The directional antenna receives a distant available WiFi signal about 1/2 mile away (max. range is about 3 miles)* and delivers it to all WiFi devices in your barn, shop, office or other outbuilding providing basic internet access.

Item # VEC3 \$329.99

*Line of sight, without walls, trees or other obstructions. Also depends on the strength of the host WiFi router. Mast not included.

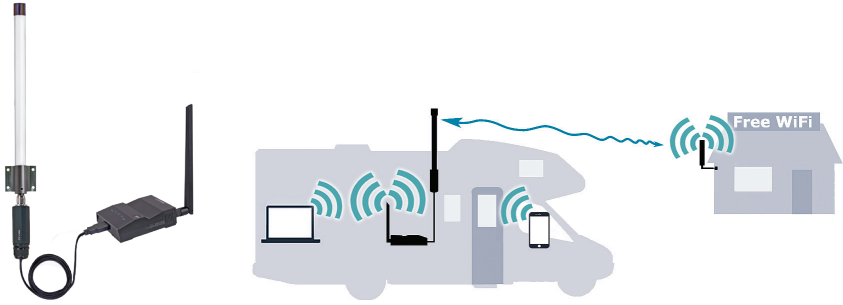

⚠ WARNING: Cancer and Reproductive Harm. www.P65Warnings.ca.gov

2. CC Vector RV Long Range WiFi Receiver System 2.4GHz

Limited Supply

How it Works: The omnidirectional 8dBi heavy duty antenna mounts to a pole or ladder outside your vehicle and connects to the CC Vector repeater inside your vehicle up to 400' away on average from the host router. The CC Vector repeats a new WiFi signal to all WiFi devices providing basic internet access.

Item # VEC2 \$279.99

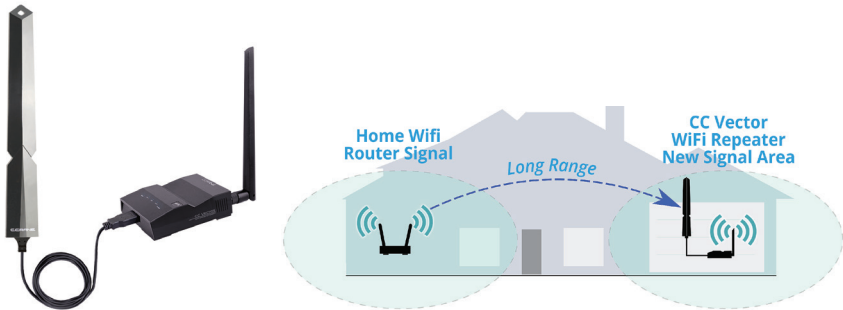

3. CC Vector Home Long Range WiFi Receiver System

Limited Supply

How it Works: Our Dual Band 2.4 GHz and 5GHz Super USB WiFi Antenna DX is smaller and can be located indoors or outdoors so it more favorably connects to a distant WiFi signal from your router providing basic internet access.

Item # VEC1 \$229.99

*Line of sight, without walls, trees or other obstructions. Also depends on the strength of the host WiFi router.

We also offer CUSTOM SOLUTIONS for large properties, RV Parks, wineries, small hotels and schools. Please see our website: ccrane.com/custom-wifi-request

"My multiple experiences with C. Crane have been simply first class. They still offer old school all American customer service. They personally answer their phones whenever possible and return calls when asked to. Anytime that I've had a questions, their representatives answered from their mind, not a script. I am unable to say enough good things about them. They are definitely A+++." – E.H.

"...C. Crane is my second [radio] purchase in the last twenty years. It is because the quality of radios are so good that I still have my original radio..." – M.L.

eNews Newsletter: Sign up for our eNews Newsletter and be the first to know about sales, exclusive offers and new products! We also share knowledge and insider tips. Visit: ccrane.com/newsletter

C.Crane Blog: Join us as we explore the world of radio, offering practical tips on products, reception, and more. We share insights that can help enhance your experience and knowledge. You can read more at: news.ccrane.com

Warranty Information: Our products come with a one-year limited warranty unless otherwise noted. **Proof of purchase is required. Warranty is void when purchased from unauthorized resellers or individuals. See website for authorized dealer list.**

Privacy Policy: We do not share or rent our mail list. To view our full privacy policy visit: ccrane.com/privacy. Thank you for your support.

Pricing: Our prices and shipping costs are valid through September 2026, barring unusual circumstances like inflation, tariffs, or an error.

60-Day Satisfaction Guarantee: If any item fails to meet your expectations, you can return it to us within 60 days like new (in its original product packaging) for a full refund. Please insure it. Shipping charges are non-refundable. Please call for a return authorization. A reasonable deduction may be made for any damaged or missing items.

What is a C. Crane Orphan? We sometimes have returned merchandise available at about 10% off its regular price; we call these "Orphans". Each item is carefully checked out and thoroughly cleaned. A full factory warranty and our 60-day satisfaction guarantee applies to these bargains also. These items are limited to stock on hand so call us to find out what is available or visit our website at: ccrane.com/orphans

Sales Tax: We collect sales tax where legally required. This is subject to change at any time.

Please keep your catalog.
